reflection > 83%.

## SonexAsia Product range

- Excellent acoustic performance in a wide spectrum
- Open cell structure which guarantee a high acoustic performance
- Products are manufactured with the use of Basotect®
- Resistant against high humidity
- Products meets all international fire regulations
- Safe to install because of the low product weight, does not substantially increase the load on the structure
- No aging
- All products are free of synthetic and mineral fibre
- Temperature resistance of -60°C to >150°C [permanent]
- Standard colours white and light grey, acoustic panels can be coated in a colour according customer request
